

TRACKMAN

SEEKING A SKILLED DEVELOPER IN COMPUTER SCIENCE

Do you want to become the newest member of our CORE algorithm team?

At TrackMan, you will play a significant role in the development of our world-leading golf and baseball proprietary radar sensor technology. You will have the opportunity to do your own research and development work, and see the direct impact of it. Our company culture is open, international, informal and fun, but we work until the job is done. If you are up for this exciting challenge where personal growth is a priority, we would like to hear from you.

ARE YOU OUR NEXT COLLEAGUE?

As a Core Developer you will be deeply involved in the development and optimization of our ball-flight measurement systems. The Core Team is responsible for converting the raw radar signal and video feeds into accurate and meaningful information about the performance of the athlete.

This process involves disciplines such as:

- Signal processing.
- Mathematic modeling.
- Tracking algorithms.
- Computer vision.

Your responsibilities will include specific ownership of a product or part of a core process within the tasks of the team, based on you experience and competencies. You will be working together with other specialist within these fields and together we strive to remain the best in the world at what we do.

YOUR BASIC QUALIFIERS:

- Master Degree in Computer Science or equivalent training.
- Strong skills in Signal Processing and / or Mathematic Modeling.
- Strong mathematical skills.
- Solid programming skills within C++ / C# / MATLAB / Python.
- Newly educated, as well as candidates with 5-10 years of experience in the field.

IS THIS ALSO YOU?

Working in a fast-paced, team-based environment also demands a certain degree of self-planning, as well as the ability to work independently. Your colleagues are highly skilled, innovative, pro-active and motivated in their work approach. They possess strong analytical skills, tend to be good communicators in Danish or English, and take pride in their job and deliverables. We expect you to be of a similar caliber.

SO WHAT DOES TRACKMAN DO?

Simply put, we help the world's best athletes get better at their game through data technology. We currently operate within golf, baseball, tennis, soccer, and the Olympic Games. Equipment manufacturers, coaches, and players alike rely on our technology. In their quest to gain a competitive edge, they demand accurate and actionable feedback.

This is where we come in.

Our Doppler, radar-based products measure ball impact, ball flight, and ball landing by providing more than a dozen different data points as reference, such as ball speed, spin rate and carry. This valuable information is instantly made accessible on the user's mobile device for easy-to-understand feedback and analysis on performance.

APPLICATIONS

If you would like to work in a creative environment with great technologies, great sports and great colleagues, please send your application to nh@TrackMan.com. You can also call Nicolaj Hermansen, Product Manager, on +45 4574 4747. For more information, please visit www.TrackMan.com

Work location is at our headquarters in Vedbæk, about 20 km north of Copenhagen.

We look forward to hearing from you.
